

FLEX CAPACITY CENTER /.

Rich Internet Applications allow to be one jump ahead in terms of quality and production in the development of web-based applications. Flex is Adobe's tool to develop Rich Internet Applications and, Cubika's Flex Capacity Center provides a complete range of Flex solutions and services.

Our professional team, formed by specialists from different fields, offers our customers the know how and the experience gained by working in the region's most important projects. We offer professional, consultancy and software development services.

The partnership with **Adobe** and a continuous investment in research & development allow us to keep one jump ahead of technological evolution, helping our customers to achieve success in every project and implementation.

Cubika's services and solutions are designed to go along with our customers in their project phases and to achieve the best possible results in Flex technology implementation.

OUR FLEX CAPACITY CENTER BENEFITS

- Reduce your team's learning curve through our Training and Mentoring services.
- Maximize the use of Flex technology and reduce your projects' time to market with our consultancy and development services.
- Minimize implementation and maintenance risks thanks to our Regional Support Team experience and know-how.

DEVELOPMENT

From our Buenos Aires' software factory, we offer applications' development and evolution services based on Flex and combined with J2EE, .Net, XML and Web Services technologies. Through our development services, our customers reach high quality applications, at reduced times and low costs, thanks to our professional team know-how and experience.

CONSULTANCY

We offer consultancy services aimed at helping our customers to deploy technologies in the most effective way and to solve their applications' complex problems.

- | | |
|--------------------------------------|---------------------------|
| • Assessment Design and Architecture | • Flex 2 Upgrade Services |
| • Prototype Development | • Quality Assurance |
| • Performance, analysis and tuning | • Code Review |

➤ REGIONAL SUPPORT

Cubika offers support services in Spanish for Adobe's Flex technologies. From our Buenos Aires headquarters and, reaching any place in the world in person when necessary, we offer a range of e-mail and telephone support plans. The support service is complemented by different Flex services offering the possibility that Cubika's specialists make actual visits to facilities anywhere in the world.

➤ TRAINING

Through our Flex experts and, thanks to our large experience in Flex technologies, we offer training services for rapid technology adoption and knowledge transfer.

- **Flex Quick Start** - This course teaches developers how to design and build a Flex application. This is a 3-days course and participants will learn Flex's main features for RIA development.
- **Flex Advanced Workshop** - A practical workshop where developers will become familiar with Flex technology advanced features. The workshop's methodology allows participants to learn from hands on experience under the guidance of Cubika's experts. Main topics include integration with J2EE applications, frameworks deployment and analysis of Flex advanced characteristics.

➤ MENTORING

Mentoring services are aimed at supporting your development team through the different project phases and, in specific aspects required by Flex technology such as:

GUIDANCE AND DEVELOPMENT GUIDELINES — PROBLEM SOLVING — BEST PRACTICES IMPLEMENTATION

The work model is based on planned meetings as well as on on demand requests according to each project characteristics and phases' needs.
